DNA Home Test or Forensic Acceptable Samples

The following prices are quoted for DNA extraction from each special sample (per person) and are in addition to the cost of the DNA comparison test (paternity, maternity, comparison etc.).

Samples should be put in envelope that is supplied with the kit.
Any additional instructions will be supplied upon ordering.

Do not store these samples in a plastic bag. Let them dry naturally at room temperature.

The lab will do everything possible to extract the DNA from these special samples.
There is no refund if DNA cannot be obtained from these types of samples.
We would not list these sources of DNA unless the lab was **highly** successful in DNA extraction.

The lab usually requires at least an additional week to process these special samples.

If you use a special sample a person instead of a buccal swab,
the price shown below is in addition to the cost of the DNA test.

Item	Price	Qty	Total Price
Excellent Samples
